

SEFAR VISION

金屬網玻璃

SEFAR VISION
Laminated Glass

產品介紹：

SEFAR VISION金屬網的金屬塗層視覺效果取決於反光效果在光線變化下，外觀有特殊金屬反射的效果；且在另一面黑色的裡層表面能協助觀看者由內而外視覺不受光線變化金屬反射之影響。

在設計上因SEFAR VISION金屬網是由黑色合成纖維製成的一系列高精度織物，可選擇單面或雙面鍍上鋁、鉻、鈦等金屬材質，或可於金屬塗層上數位印製客戶指定的顏色或圖案，來配合整體建築設計。

與Dupont SentryGlas interlayer結合為SEFAR VISION金屬網玻璃，不僅大大提升其安全性，亦可完整呈現金屬原色及其通透度。玻璃可直接外露也增添產品應用多元性。

特性：

1. 增加視覺品質，提升畫面美感。
2. 可與不同顏色框架做搭配，提升建築外觀一致性。
3. 搭配適當的室內照明可作空間隔間或裝潢之用。
4. Dynamic light play 與太陽光及周遭環境的互動也是關注焦點之一。
5. 與Dupont SentryGlas interlayer結合，安全性佳。
6. 可與彎曲玻璃結合應用。

用途：

外牆、室內裝潢、隔間、專櫃等。

Introduction :

The most impressive feature of SEFAR VISION fabric is it has the natural metal reflection through outward light. As the change of light or from different angles, a different metal reflection will be appeared. However, if looked from inside to outside, it will not be seen through the black fabric SEFAR VISION.

A black precision fabric that can be coated with aluminum, chromium, titanium or printed copper and gold on single or double side; furthermore the metalized fabric side can have a special design printed on it to match the whole concept of the design of the building. The SEFAR VISION laminated glass has to be produced with Dupont SentryGlas interlayer as the final product which can not only increase the safety but also completely present the original metal coating color and transparence. SEFAR VISION laminated glass is ideal to apply with free-of-frame glass to increase its possibility on every kind of application.

Characteristics :

1. Increase visual quality and full of aesthetics.
2. Match different colors of frame and increase the consistency of the architectural appearance.
3. Appropriate indoors lighting are also used for decoration.
4. Dynamic Light Play: Interaction with sunlight.
5. The SEFAR VISION laminated glass with Dupont SentryGlas interlayer will increase the safety.
6. Bent glass available.

Applications :

façade, interior, compartment, shop and etc

2010西班牙 Fashion House(辦公大樓)帷幕外牆
2010 Spain Fashion House(office) Façade

2012俄國 Minsk BKK GeschŠtsgebŠude(住辦大樓)
2012 Russia Minsk BKK GeschŠtsgebŠude (synthesize building)

帷幕外牆 (紅色區域)
Façade (red area)

建築內部之視覺感受未受影響
the interior has no effect on sight

玻璃種類 Glass Type	(mm)厚度 Thickness(mm)	最大尺(mm)x(mm) Max Size(mm □mm)	最小尺(mm)x(mm) Min Size(mm □mm)
無限制	6 ~ 30	3600 × 2200	Ø00 × 30
